ADA CERP Recognized Provider.

# Predictable Endodontic Outcomes in the General Practice: Efficiency Through Simplicity

Presented by David Landwehr, DDS, MS | Friday, January 20, 2023  
Frederik Meijer Gardens & Sculpture Park | CE Credits: 7

**Dr. David Landwehr** is a Wisconsin native. He earned his D.D.S. at the University of Minnesota. He received an M.S. degree and certificate in Oral and Maxillofacial Pathology at The Ohio State University followed by specialty training in endodontics at the University of Michigan. Dr. Landwehr has been a private practice clinician for more than twenty years and for the last six years has provided exemplary patient care at Capital Endodontics in Madison, WI. Though his daily work focuses on endodontics, his dual certification makes him especially qualified to diagnose pathologies unrelated to the dental pulp.

Dr. Landwehr's ongoing work as an educator and opinion leader has positioned him at the forefront of modern endodontic treatment. He has lectured and presented case studies both nationally and internationally. Dr. Landwehr served as an evidence reviewer for the American Dental Association and as the Chief of Endodontics for the Meriter Hospital general practice residency for more than ten years. Dr. Landwehr recently authored a chapter on lesions that mimic endodontic pathosis for the 12th edition of *Cohen's Pathways of the Pulp*. His teaching focuses on the techniques used daily in his clinical practice that are efficient and evidence based.

Endodontic success is dependent on a variety of interrelated factors, but removal of bacteria from the root canal system is the ultimate goal. Prior to root canal treatment, the pathway to endodontic diagnosis may be filled with twists and turns that prevent the clinician from making a definitive and accurate diagnosis. Following diagnosis, it is imperative that all canals are located and instrumented to the root apex to achieve maximum disinfection. This session will place special emphasis on locating the hard-to-find canals prior to using a rotary instrument in order to establish a predictable and reproducible glide path to the root apex. An evidence-based review of cutting-edge instrumentation options will be presented with special emphasis on different instrument designs and mechanical movements. Lastly, enhanced irrigation protocols will be explored along with state-of-the-art obturation techniques.

## Highlights:

The participants will learn:

- How to increase the accuracy of endodontic diagnosis by understanding the limitations of pulp testing and radiology.
- Clinically relevant strategies for locating typical root canal anatomies and tips for identifying hard-to find canals.
- The design features and working characteristics of the most commonly used root canal instrumentation systems and their impact on clinical efficiency and predictability.
- A simple and efficient irrigation protocol for maximum disinfection of the root canal system and obturation techniques to place a dense three-dimensional filling in any root canal anatomy.

## Schedule

### Seven hours of Continuing Education Credit

Registration: 7:30 am – 8:00 am  
 Seminar: 8:00 am – 4:00 pm  
 Lunch: 12:00 noon  
 Morning refreshments, lunch, and afternoon refreshments are included in cost.

## Registration Fee

### Early Registration

MDA-member Dentist (ea.) – \$225  
 WMDDS retired member Dentist (ea.) – \$100  
 Staff: 1st – \$100; 2nd-5th – \$90  
 6th-12th – \$85; 13th and over – \$80  
 Non-member Dentist (ea.) – \$450

### Late Registration Fee

After January 10, 2023, please add additional \$50 to the registration fee.

**Please register now. Seating is limited.**

**A 48-HOUR NOTICE OF CANCELLATION IS REQUIRED FOR ALL CE PROGRAMS. AN EMAIL IS ACCEPTABLE NOTIFICATION. REFUNDS WILL BE GRANTED UPON WRITTEN REQUEST.**

**FOR MORE INFORMATION CONTACT ELAINE FLEMING AT 616.916.8559 OR EFWMDDS@AOL.COM**
